

AIRCRAFT WARNING LIGHTS

Realization of obstruction lighting to air navigation

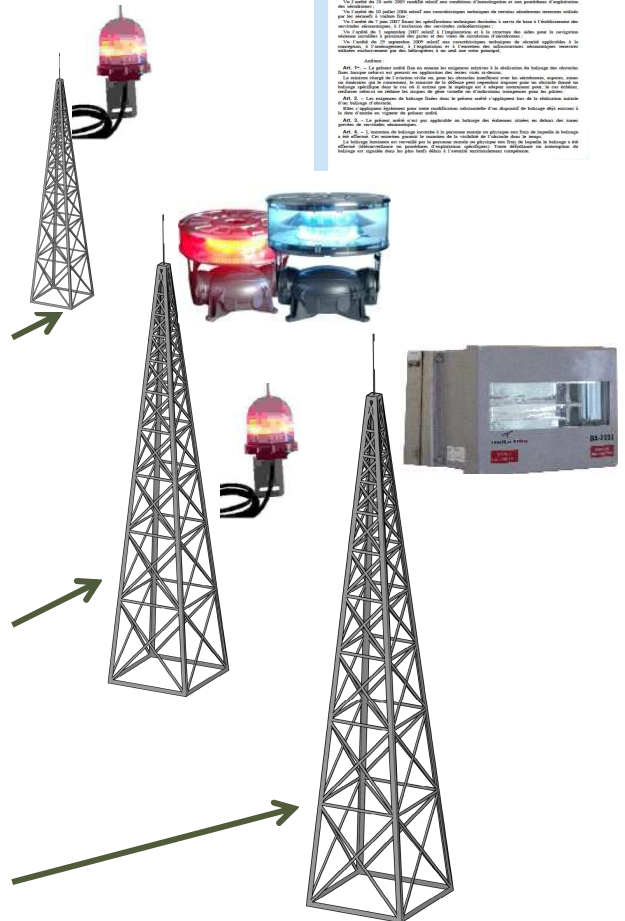

Decree of december 7, 2010

Document available in its entirety on our website:
www.delta-box.com

Aircraft beaconing rules

Obstacle height	Light type
< 45M	Low Intensity Type A or B (Low intensity beacon >10 or >32 cd)
45M up to 150M	Medium Intensity Type A (20 000Cd) Or Medium Intensity Type B (2000Cd) and BI Type B (>32 cd)
>= 150M	High Intensity Type A (High intensity beacon 200 000cd)

General recommendations :

- Uninterruptible power supply required (12 hours of autonomy)
- Synchronized windturbines beaconing (White medium intensity beacons on the day and red for the night)
- Beaconing must be visible all over the place
